

PRODUCTS AND SERVICES

- Solar & Wind structural fabrication
- Electric Vehicle design and fabrication
- Solar charging stations & infrastructure

- Smart grid integration & interconnection
- Solar power inverters and accessories
- Wind power inverters and accessories

- Battery management and charge control
- High quality line of batteries and cables
- Solar panels and wind system installation

- OEM combiner boxes and switches
- Cabling and other electrical components
- Battery box compartments and venting
- Commercial consulting and installation

PROFESSIONAL RENEWABLE ENERGY SOLUTIONS

*Global Leader of Renewable
Engineering and Solar
Energy Installation*

SOLAR ENERGY SYSTEMS

1. No scams! Absolutely no pyramids! No multi-level marketing! No locked in electricity rates! Only hands on highly trained installation crews and experienced field trained sales representatives that can answer all of your questions.
2. Choose us as your installer and receive a guarantee on your installation services. Expect the highest confidence in our work and nothing but professional teams working on your projects.
3. Contact Helios Electric with any further questions or concerns. We are here to help you make the right decision.

ABOUT HELIOS ELECTRIC

The president of Helios Electric is an Electrical Engineer with more than ten years of hands on experience in electrical construction, solar energy installations, semiconductor theory and solar energy design.

We are a full time installation, distribution and consulting company located in Dallas Texas with experienced construction teams and managers. We distribute a huge selection of renewable energy products, installation services and green solutions.

WHY INSTALL SOLAR ENERGY?

1. **My electric bill:** Immediately reduce electric bills. Your investment is instantaneous and savings will begin to accumulate as soon as you turn your solar system on.
2. **Independence:** Work your way to becoming your own completely independent electric company. Reduce your reliance on corporate electricity and highly volatile rates. Begin taking advantage of your own source of power.
3. **Cleaner environment:** Significantly reduce pollution and help reduce global warming effects.

WHAT TO LOOK FOR

1. **Crews with hands on experience:** Choose a company that has seen it, done it, designed it and knows energy systems inside out.
2. **Engineering design:** An engineer can design a system to not only last longer but also be more efficient. We will design a reliable system that will produce the most electricity and take up the least amount of area for the best price.
3. **A sales team that knows their product:** Look for a company that has experienced field trained hands on sales representatives.

WHY CHOOSE HELIOS ELECTRIC?

We are what to look for and more. We have the experienced sales teams, the design engineers, the experienced crews, reliable suppliers, distribution experience and our goal is to make our customers as electrically independent as possible. We practice what we preach and look for environmentally friendly ways to manufacture our products, manage an energy efficient warehouse, run a virtually paperless organization and recycle.
