

"A Truly Green Company Manufacturing High Quality Green Solutions"

TF Series HelioFlo Solar Attic Ventilation Systems

- 1.) Utilizing off the grid sun energy to produce forced air ventilation and provide independent and FREE cooling power
- 2.) The worlds most powerful solar electric motors engineered with our solar panel technology to produce higher air flow rates, move more cubic feet per minute and reduce attic moisture and dust
- 3.) Cooler air is sucked into your attic through our electric forced air HelioFlo ventilation systems
- 4.) Helios solar technology produces continuous airflow for up to 12 hours a day even in low sunlight conditions without using any utility power
- 5.) Less stress on air conditioning equipment using no electricity therefore lowering utility bills

- ☀ The **NEW GENERATION** HelioFlo TF-3600 solar electric attic ventilation system ☀
- ☀ HelioFlo attic ventilation systems move five times more air flow than any competitor ☀
- ☀ Long life solar panel technology with high quality hail resistant tempered glass ☀
 - ☀ Save money with a quick payback on HelioFlo attic ventilation systems ☀
 - ☀ Efficient solar panel placement to maximize output power and air flow ☀
 - ☀ HelioFlo solar panels produce up to 12 hours of air circulation time ☀
 - ☀ HelioFlo solar panels produce more power in low light conditions ☀
 - ☀ Receive a 30% federal tax credit and a 20% solar rebate ☀

"Cooler Attics = Cooler Homes"
